

A05000 Commercial Air Purifier™

The A05000 should be part of the equipment that "First Responders" have for emergencies. After every flood the homes need to be sanitized before re-entering for clean up. Every factory, every restaurant, every hospital, every fire station, every police station, every clinic, every doctor's office, every hotel, every locker room etc. needs one or several as part of their equipment to take care of smoke, fumes, odors, and to sanitize the work area for employees.

Air Oasis Air Purifiers™ have been extensively tested and proven effective against a wide range of contaminants including **MRSA**. These two petri dishes show an example of mold and bacteria reduction after only 24 hours of using an Air Oasis unit.

Features and Benefits

- Reduce Mold
 - Reduce Bacteria
 - Reduce Viruses
 - Reduce VOCs
 - Reduce Allergens
 - Reduce Odors
 - Portable
 - Made in USA
 - Plug In and Go
 - 3 Year Warranty
 - No Maintenance
- Exclusive patent-pending AHPCO filterless air purifier technology.
- Easy to use. Simply place air purifier in desired location and press switch to on position.

Specifications

Coverage: Up to 5000 sq. ft.*

Dimensions: 18" x 6" x 4"

Electrical: 115VAC 104 Watts
(220V optional)

Replacement Cell: AHPCO-5009

Materials: Aluminum & Polymers

* Areas of higher contamination or closed floor plans may require multiple units to cover suggested sq. ft.
